1. Introduction

Introduction

This data booklet deals with Grundfos submersible wastewater and sewage pumps, types SL1 and SLV.

Two types of pumps are available:

SL1 pumps with S-tube® impeller

- SLV pumps with SuperVortex (free-flow) impeller.

TM04 3597 4708 - TM04 3598 4708

Fig. 1 SL1 (S-tube®) and SLV (SuperVortex) pumps

The S-tube® impeller is the only impeller available in the wastewater market that compromises neither efficiency nor free passage through the pump.

The pumps are SuperVortex or S-tube® impeller pumps specifically designed for pumping sewage and wastewater in a wide range of municipal, private and industrial applications.

The pumps are made of resistant materials, such as cast iron and stainless steel. These materials ensure long and reliable operation.

The pumps are fitted with motors from 1.5 hp up to and including 15 hp (1.1 to 11 kW). The motors are either 2- or 4-pole motors, depending on the motor size. The free passage in the pumps is 2-4" (50-100 mm)

The pumps are available for:

- submerged installation on auto-coupling system
- submerged installation, free-standing.

Applications

Typical applications are transfer of liquids, such as:

- municipal wastewater
- wastewater with a high content of fibers (SuperVortex impeller)
- drainage and surface water
- domestic wastewater
- industrial wastewater
- process and cooling water.

The pumps are ideal for pumping the above liquids from for instance:

- municipal network pumping stations
- inlet pumping stations in wastewater treatment plants
- primary clarification in wastewater treatment plants
- secondary clarification in wastewater treatment plants
- stormwater pumping stations
- public buildings
- residential buildings
- factories/industry.

Grundfos blueflux®

Grundfos blueflux® guarantees the highest motor efficiency from Grundfos. Every aspect of the technology driving a Grundfos blueflux® motor has been developed to meet the actual needs of the application for which the pump system or solution is installed - and always with an emphasis on reliability and efficiency.

A pump system or solution with a Grundfos blueflux® motor has a considerably higher total efficiency than comparable solutions and reduces life cycle costs substantially. The combination of motor technology, advanced pump design and speed control ensures superior system control, reduced day-to-day service costs and lower environmental impact.

Grundfos blueflux® represents a range of skills and innovative processes that Grundfos brings to motor technology development. Grundfos was instrumental in the drafting and passing of the EuP Directive, setting the ecodesign requirements for electric motors in the European Union.

As a technological leader within high-efficiency motors, Grundfos was invited to help with the technical aspects of the legislation. Grundfos was able to create political awareness of the huge savings potential of variable speed motors and, at a later stage, influence the decision-makers to include variable-frequency drives in the new legislation. As a consequence, Europe's annual power consumption will be reduced by 5 % by 2020 - about ten times more than originally planned before Grundfos intervened.

The Grundfos blueflux® label guarantees that the motor technology used is ahead of current market standards and either meets or exceeds legislative requirements for motor efficiency, where these apply.

smartdesign

smartdesign

smartdesign describes the functional design of our products that combines elegant appearance with smart features, created with customer needs in mind. smartdesign does not only look good; the design also makes installation, operation and maintenance of the product easier and more user-friendly.

The smartdesign features of our SL1 and SLV pumps include:

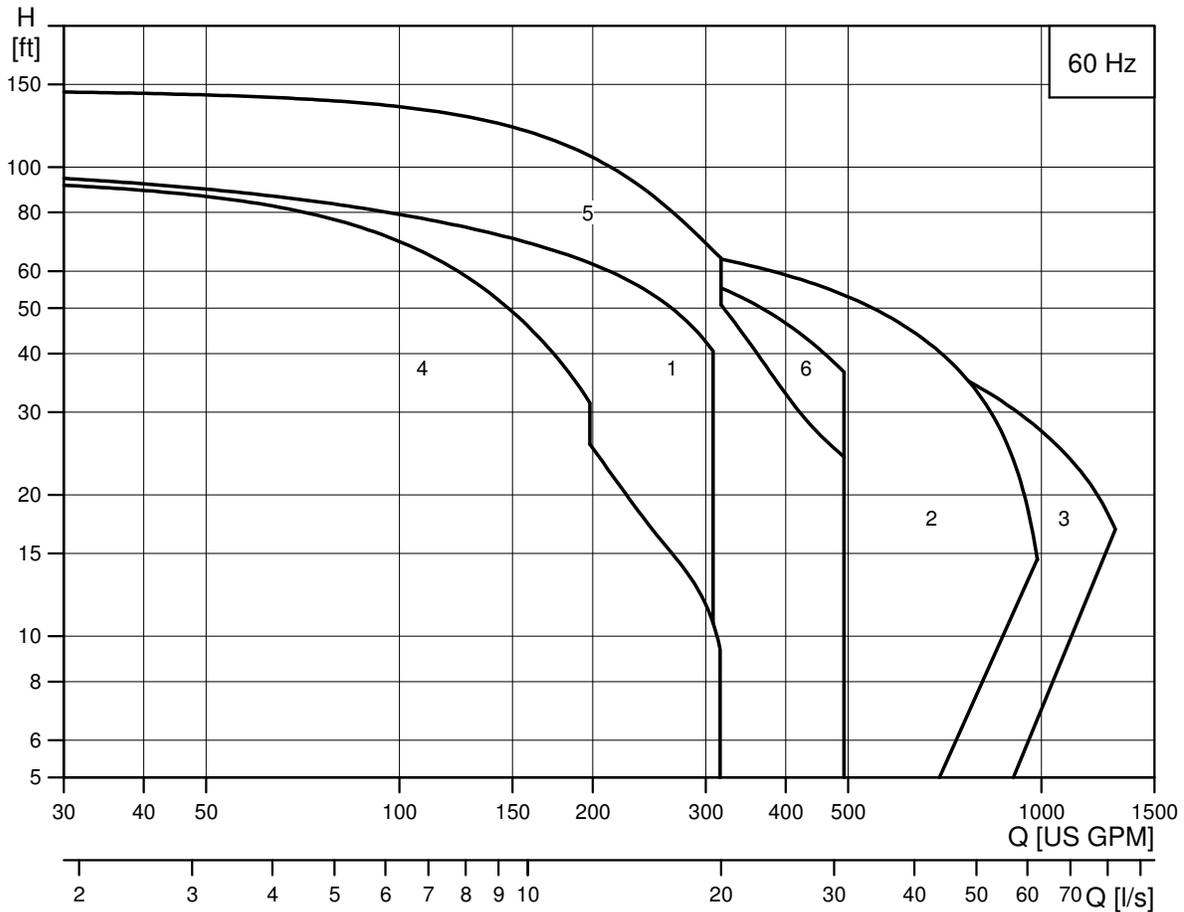

- moisture-proof cable plug connection made of corrosion-resistant stainless steel with conductors embedded in polyurethane sealant
- stainless steel clamp connection between motor housing and pump housing for easy service.
- power cable incorporating wires for thermal sensors in the motor windings
- no extra cable required for sensors in pumps with sensors
- monitoring of operating conditions for pumps with sensors
- moisture detector for continuous monitoring of motor enclosure and automatic cut-out in case of leakage
- heavy-duty bearings greased for life
- built for variable-frequency operation
- smooth pump surface prevents dirt and impurities from sticking to the pump
- self-cleaning S-tube® impeller with a long vane reducing the risk of jamming or clogging, or Super-Vortex impeller with high pumping efficiency and less downtime
- explosion-proof motors for potentially explosive environments (FM-approved pumps)
- motor in insulation class H (356 °F (180 °C)), enclosure class IP68 with one thermal sensor in each phase
- temperature rise class A
- service-friendly design:
 - clamp connection between motor and pump housing
 - double mechanical cartridge shaft seal
 - cable connection to motor via plug.
- motor built of highly efficient components, offering lower motor temperature and longer life.

2. Performance range

Performance range for SL1, SLV pumps

The figure below shows the performance range of SL1 and SLV sewage and wastewater pumps. It gives an overview of the various sizes and impeller types.

Note: For information about the performance range of each individual pump, see pages 36 to 89.

TM04 7578 2014

Pump type	Curve no.
SL1.20.A25.30	1
SL1.20.A25.40	
SL1.20.A25.55	
SL1.20.A30.30	
SL1.20.A30.40	
SL1.20.A30.55	2
SL1.30	
SL1.40	
	3

Pump type	Curve no.

If your required duty point exceeds the performance range above, please see the Grundfos SE, SL or S range data booklets available online via Grundfos Product Center.

3. Identification

Type key

The pump can be identified by means of the type designation. The type designation is stated on the nameplate of the pump.

Example **SL1.30.A30.55.A.Ex.4.6.0D.A.Q.Z**

Code	Explanation	Designation
SL	Grundfos sewage/wastewater pump	Pump type
1	S-tube® impeller	Impeller type
V	SuperVortex (free-flow) impeller	
20	2" (50 mm)	Free spherical passage
25	2.5" (65 mm)	
30	3" (80 mm)	
40	4" (100 mm)	
A25	ANSI 2.5" (DN 65)	Pump outlet
A30	ANSI 3" (DN 80)	
A40	ANSI 4" (DN 100)	
A60	ANSI 6" (DN 150)	
55	Output power, P2 / 10 55 = 5.5 hp (4.0 kW)	Power [kW]
[]	Standard	Sensor version
A	Sensor version	
2	2-pole	Number of poles
4	4-pole	
[]	Non-explosion-proof pump, standard	Pump version
Ex	Explosion-proof pump	
6	60 Hz	Frequency [Hz]
0J	3 x 208 V Δ, direct-on-line starting	Voltage code and starting method
1H	3 x 460 V Δ standard, star-delta starting	
0L	3 x 575 V Δ, direct-on-line starting	
1L	3 x 575 V Δ, star-delta starting	
1R	3 x 230 V Δ / 460 V Y, direct-on-line starting	Generation
[]	1st generation	
A	2nd generation	
B	3rd generation	
[]	Complete pump in cast iron	Pump material
Q	Cast iron pump with stainless steel impeller	
[]	Pump in standard range	Customization
Z	Custom-built pump

4. Selection of product

Ordering a pump

When ordering a pump, you need to take the following five aspects into consideration:

1. pump type
2. custom-built variation (option)
3. explosion-proof version
4. accessories
5. pump controller.

Pump type

Use the following table to identify the type of pump that best meets your needs. The table is for guidance only.

Description	SL1	SLV
Liquid and operation characteristics		
Dry solids content up to 3 %	X	X
Dry solids content up to 5 %		X
Relatively low content of fibres and solids	X	X
Relatively high content of fibres and solids		X
Relatively low number of operating hours	X	X
Relatively high number of operating hours	X	
Applications		
Stormwater	X	X
Groundwater	X	X
Drainage and surface water	X	X
Drainage and surface water with small impurities	X	X
Abrasive surface water	X	X
Wastewater with long fibres, e.g. from laundries	X	X
Domestic wastewater with discharge from toilets	X	X
Municipal sewage	X	X
Sewage from commercial buildings	X	X
Industrial process water with fibres/solids		X
Industrial process water with solids	X	X
Industrial process water without solids and fibres	X	

When you have selected the pump type, you can identify the specific pump that best meets your needs in [Dimensions](#) on page 96 and [Type key](#) on page 6. The list below is a detailed description of the product you get if you order the following pump:

Pump	Product no
SLV.25.A25.30.2.61H.C	98634243

- pump as specified in the type key
- 49 ft (15 m) cable
- paint: NCS 9000N black (RAL 9005), gloss code 30, thickness 100 µm
- thermal switch in stator windings
- tested according to Hydraulic Institute Centrifugal pump test ANSI/HI 11.6:2012 Grade 3B.

See [Performance curves and technical data](#) for selection of a standard pump.

Note: Product-specific data for the pump can also be found in online via Grundfos Product Center using the product number 98634243.

Custom-built variants

The pumps can be customized to meet individual requirements. Many pump features and options are available for customization, such as explosion-proof versions, various cable lengths or special materials. Variants can be seen in the table in [List of variants](#) on page 8. For requirements or designs outside not included in this table, please contact Grundfos.

Explosion-proof version

The entire range is available in explosion-proof versions.

The SL1 and SLV pumps have the following explosion protection classification: Class I, Division 1, Groups C and D, T4, T3, IP68.

Accessories

Depending on the installation type, accessories may be required. See [Installation systems](#) on page 102 for selection of the correct accessories.

Note: Ordered accessories are not fitted from factory, but need to be fitted on site.

Pump controller

Fig. 3 Grundfos Dedicated Controls

Grundfos Dedicated Controls is a control system designed for installation in either commercial buildings or network pumping stations with one to six pumps. As standard, the system comes with application-optimized software and can be configured to meet your specific pumping needs.

For further information about Grundfos Dedicated Controls, see page 22.

TM06 09/18 1214

5. Variants

List of variants

Motor

Various cable lengths	Note: When using a different cable length than the standard lengths (i.e. 33 ft and 49 ft), a new cable cross section must be calculated	33 ft (10 m)
		65 ft (20 m)
		80 ft (25 m)
		100 ft (30 m)
		130 ft (40 m)
EMC power cables	Screened power cables for variable-speed drives	33 ft (10 m)
		50 ft (15 m)
		65 ft (20 m)
		80 ft (25 m)
		100 ft (30 m)
		130 ft (40 m)

7. Product description

Features

Ball bearings

The bearings are greased for life.

Main bearings:

10 hp (7.5 kW) 4-pole, 12 hp (9.2 kW) 2-pole, 15 hp (11 kW) 2-pole:	Angular contact bearing 3209B.2RS.C3.SYN.
4 hp (3 kW) 4-pole to 10 hp (7.5 kW) 2-pole:	Angular contact bearing 3208B.2RS.C3.SYN.

Support bearings: Single-row deep-groove ball bearing.

Shaft seal

TMO5 0015 0511

Fig. 12 Double mechanical cartridge shaft seal

The shaft seal consists of two mechanical seals and separates the motor from the pumped liquid.

The shaft seal is a cartridge seal that enables easy service.

The combination of the primary and secondary seals in a cartridge results in a shorter assembly length compared to traditional shaft seals. Furthermore, this design minimizes the risk of incorrect fitting.

The primary seal is SiC/SiC and the secondary is carbon/ceramic.

Motor

The motor is a watertight, totally encapsulated motor.

- Insulation class: H (356 °F (180 °C)).
Motor insulation fulfills NEMA MG1 part 31 as regards frequency converter duty.
- Temperature rise class: A.
- Enclosure class: IP68.

For motor protection and sensors, see [Sensors](#), page 20.

Power cables

Standard cable

Cable type	Outer cable diameter [in. (mm)]	Bending radius	
		Fixed [in. (mm)]	Free [in. (mm)]
7 G AWG 16	0.523 (13.3)	1.25 (31.8)	1.875 (47.6)
4 G AWG 14 + 3 G 16 AWG	0.636 (16.2)	1.25 (31.8)	1.875 (47.6)
7 G AWG 14 + 3 G 16 AWG	0.811 (20.6)	1.5 (38.1)	2.25 (57.2)

EMC cable

Cable type [mm ²]	Outer cable diameter [in. (mm)]	Bending radius	
		Fixed	Free
4 G AWG 14 + 3 G 16 AWG screened cable	0.695 (17.7)	1.5 (38.1)	2.25 (57.2)

The standard cable length is 49 ft (15 m). Other cable lengths are available on request. See [Various cable lengths](#), page 8.

The number and dimension of cables depend on the motor size.

Cable entry

TM05 0016 0511

Fig. 13 Moisture-proof cable plug

The stainless steel plug is fastened with a union nut. The nut and O-rings provide sealing against liquid penetration.

The plug is filled with a polyamide material that is cast into the plug around the conductors of the cable to prevent moisture from penetrating into the motor via the cable core.

Surface treatment

Grundfos SL1 and SLV pumps are given the following surface treatment:

Powder painting: NCS 9000N (RAL9005 Black) gloss code 30, thickness 100 µm.

Sensors

TM05 0017 0511

Fig. 14 Analog water-in-oil sensor

As standard, the pump is equipped with thermal switches in the stator windings.

Customized analog sensor options

1. PT1000 sensor in motor windings for stator temperature measurements.
2. WIO (water-in-oil) sensor. The WIO sensor fitted in the oil chamber of the pump monitors whether water enters the pump from the liquid side. The sensor measures the water content (0 to 20 %) in the oil and converts the value into an analog current signal which is sent to an IO 113 sensor module. It also sends a signal if the water content is outside the normal range (warning), or if there is air in the oil chamber (alarm). The sensor is fitted in a stainless steel tube for mechanical protection.
3. Moisture switch. The moisture switch fitted in the motor chamber monitors whether water enters the pump. If moisture is detected in the motor chamber, the moisture switch will trip and send a warning to the IO 113 sensor module.

IO 113 sensor module

Fig. 15 Grundfos IO 113 sensor module

The IO 113 module is a protection module for Grundfos wastewater pumps. It has inputs for digital and analog pump sensors and can stop the pump if a sensor indicates a pump fault. IO 113 can be connected to the Dedicated Controls system offered by Grundfos and provides advanced monitoring functions:

- motor temperature
- moisture in motor
- water in oil
- insulation resistance.

Note: All pump versions with sensor need an IO 113 sensor module to operate properly. Modules are sold separately and can be found in [Accessories](#) on page 102.

Testing

All pumps are tested before leaving the factory. The factory test report is based on HI 1.6 - 2000 acceptance level B. Test reports are delivered with the pump.

Test certificates can be ordered directly with the pump or separately based on the pump serial number.

Other tests or third-party inspection certificates are available on request. See [Variants](#), page 8.

Operating conditions

The SL1 and SLV pumps are **only** for submerged installation.

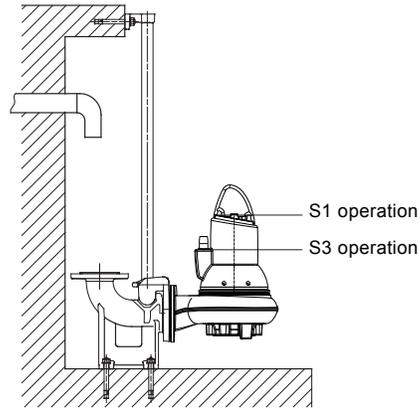

Fig. 16 Operation levels

- Continuous operation S1 when the pump is fully submerged to the top of the motor.

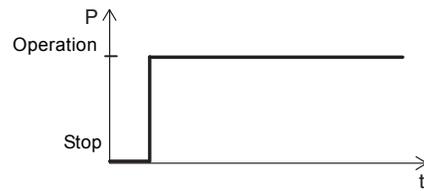

Fig. 17 Continuous operation

- Intermittent operation S3 with maximum 20 starts per hour when the pump is submerged to the bottom of the cable plug. The pump must run for maximum 4 minutes and stop for minimum 6 minutes. See fig. 18.

Note: Explosion-proof pumps **must** always be fully submerged.

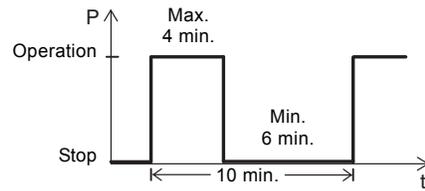

Fig. 18 Intermittent operation

Pumped liquids

Pump type	Material variant	Material	pH value
SL1/SLV	Standard	Cast iron impeller and pump housing	4-10
SLV	Q	Stainless steel impeller and cast iron pump housing	6-14 ¹⁾

¹⁾ For fluctuating pH values the range is pH 4 to 14.

Liquid temperature: 32-104 °F
(0-40 °C)

When pumping liquids with a density and/or a kinematic viscosity higher than that of water, use motors with correspondingly higher outputs.

For short periods (maximum 3 minutes), temperatures up to 140 °F (60 °C) are permissible (non-Ex versions only).

Sound pressure

The sound pressure level of the pump is lower than the limiting values stated in the EC Council directive 2006/42/EC relating to machinery (the EC Machinery Directive).

Motor range

Shaft power [hp (kW)]	No of poles
1.5 (1.1)	4
1.8 (1.3)	4
2 (1.5)	4
3 (2.2)	2/4
4 (3)	2/4
5.5 (4)	2/4
7.5 (5.5)	4
8 (6)	2
10 (7.5)	2
12.5 (9.2)	2
15 (11)	2

Pump controllers

The pumps must be connected to a control box with a motor protection relay with IEC trip class 10 or 15.

Note: Pumps for hazardous locations must be connected to a control box with a motor protection relay with IEC trip class 10.

The pumps can be controlled by the following pump controllers:

- Grundfos Dedicated Controls
- SLC, Simplex Level Controller
- DLC, Duplex Level Controller

For further information about Dedicated Controls and SLC, DLC controllers, please see page 104.

Variable-speed operation

All SL1, SLV pump types are designed for speed-controlled operation to keep the energy consumption at a minimum.

To avoid the risk of sedimentation in the pipes, we recommend that you operate the speed-controlled pump within a speed range of 30 % to 100 % and at a flow rate above 3.3 ft/s (1 m/s).

We recommend that you use EMC cables when using pumps with sensors because it helps prevent interference due to line noise.

For more information, please see the installation and operation instructions of SL1/SLV pumps US-P/N 97640137 at www.grundfos.com.

Approvals

The SL1 and SLV pumps have been approved by CSA and FM, and the explosion-proof versions hold an FM type examination certificate no. 3035318.

Approval standards

The pumps are approved by CSA and FM according to UL778, C22.2 no. 108 and FM 3600, FM3615 and FM3615.80.

Explanation of FM approval

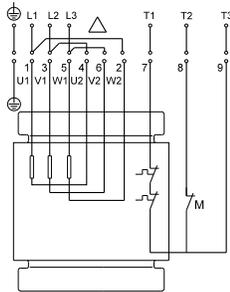

The SL1 and SLV pumps have the following explosion protection classification: Class I, Division 1, Groups C and D, T4, T3, IP68.

Standards	Code	Description
	Class I	= Explosive atmosphere is caused by gas or vapors
	Division 1	= Area classification
FM3600 FM3615 FM3615.80	Groups C and D	= Classification of gases
	T4/T3	= Maximum surface temperatures are 275 °F (135 °C) and 392 °F (200 °C), respectively
	IP68	= Enclosure class according to IEC 60529

SL 61 R voltage variant

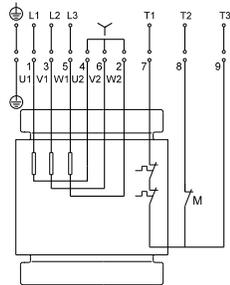

To standardize and help minimize part numbers and pump versions of the SL product portfolio, Grundfos created the 61 R voltage variant. 61 R is a dual-voltage (230 V / 460 V), three-phase, 60 Hz, direct-on-line (DOL) connected motor.

- Connect 230 V pumps using the low-voltage (delta) connection.
- Connect 460 V pumps using the high-voltage (star) connection.

TM05 7155 0613

Fig. 19 61 R, 230 V DOL wired in low-voltage (delta) connection

TM05 7156 0613

Fig. 20 61 R, 460 V DOL wired in high-voltage (star) connection

The 61 R voltage variant provides a large voltage range for supply power.

Stated voltage	Percentage variation	Voltage range
230 V	+/- 10 %	207-253 V
460 V	+/- 10 %	414-506 V

9. Curve charts and technical data

The following pages are divided into sections:
Pages 34 and 35 give a brief explanation of how to read the curve charts and the curve conditions etc.

Pages 36 to 89 gives the pump performance curve, electrical and pump data.

Performance curves and technical data

34

Curve conditions

The guidelines below apply to the curves shown in the performance charts on pages 36 to 89.

- Tolerances according to HI 11.6 - 2012 acceptance level 3B.
- The curves show pump performance with different impeller diameters at the rated speed.
- The bold part of the curves show the recommended operating range.
- The curves apply to the pumping of airless water at a temperature of 68 °F (20 °C) and a kinematic viscosity of 1 cSt (1.076 (ft²/s) x 10⁻⁵).
- **Eff:** The lines show values of the hydraulic efficiency, i.e. Eff1 is the total efficiency (pump + motor) and Eff2 is the hydraulic efficiency (pump).
- **NPSH:** The curves show average values measured under the same conditions as the performance curves.
When dimensioning the pump, add a safety margin of at least 1.6 ft (0.5 m).
- In case of densities other than 133.5 ounces/gallon (1000 kg/m³), the outlet pressure is proportional to the density.
- When pumping liquids with a density higher than 133.5 ounces/gallon (1000 kg/m³), motors with correspondingly higher outputs must be used.

Calculation of total head

The total pump head consists of the height difference between the measuring points + the differential head + the dynamic head.

$$H_{\text{total}} = H_{\text{geo}} + H_{\text{stat}} + H_{\text{dyn}}$$

H_{geo} : Height difference between measuring points.

H_{stat} : Differential head between the inlet and the outlet side of the pump.

H_{dyn} : Calculated values based on the velocity of the pumped liquid on the inlet and the outlet side of the pump.

Performance tests

All pumps are factory tested to a Grundfos testing standard that is similar to the hydraulic Institute 11.6:2012 grade 3B. These Grundfos standard curves are provided with each pump. For tests according to ANSI/HI 11.6:2012 grade 3B, see [Tests](#) on page 8.

The testing equipment and measuring instruments are designed and calibrated in accordance with the mentioned standards.

For customized duty point or other grades with 5 point test certificate, please contact Grundfos in order to agree on terms before ordering.

Certificates

Certificates have to be confirmed for every order and are available on request. See [Certificates](#) on page 8.

Witness test

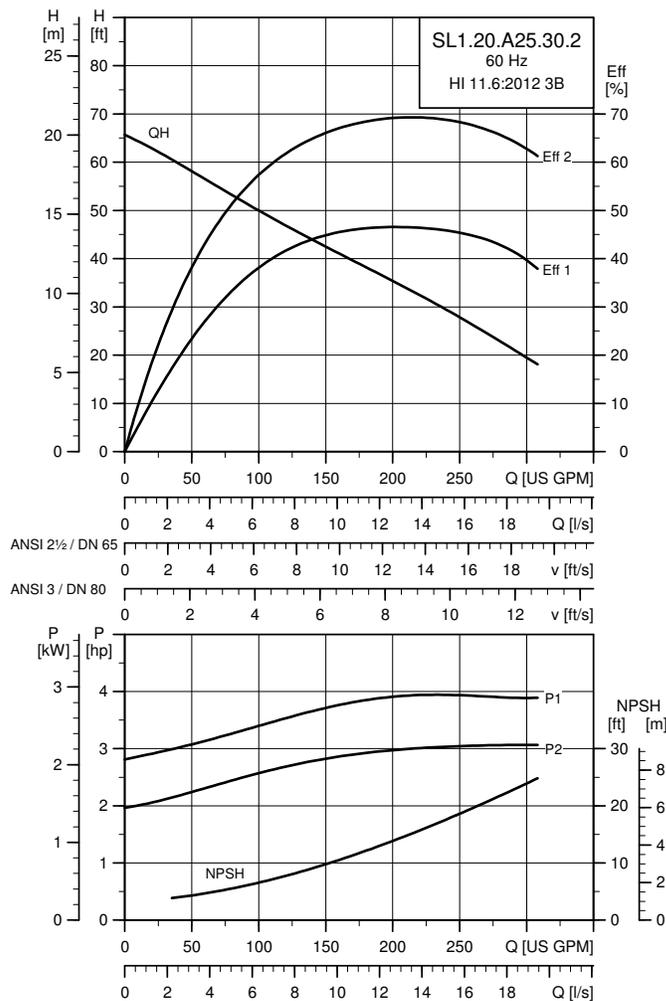

It is possible for the customer to witness the testing procedure according to Hydraulic Institute 11.6 - 2012. The witness test is not a certificate and will not result in a written statement from Grundfos. The witness test only guarantees that everything is carried out as prescribed in the testing procedure.

If the customer wants to witness the pump performance test, such request must be stated on the order.

Additional options

SLC and DLC	Product number
Battery backup with charger (for alarm only)**	Consult factory
Intrinsically safe relay for float inputs with UL698A Listing (FC only)**	
Intrinsically safe barrier/relay for pressure transducer and backup floats, UL698A (PT only)**	
Padlockable main disconnect switch	
Phase monitor with fusing	
304 stainless steel panel	
Enclosure adder	

** Enclosure adder is required

Note: Seal-failure sensor(s), overtemperature sensor(s) are standard. Condition messages, such as run time, alarms and pump cycles are displayed on the HMI operating panel.

Submersible, analog level pressure transducer

Picture	Description	Product number
	TM06 6891 2516 Grundfos submersible, analog level pressure transducer kit (sensor and birdcage) with 65 ft PUR cable 0-9 psi (0 - 0.62 bar) / 0 - 20.1 ft (6.1 m) measuring range, stainless steel birdcage	99045076

Level switches

Picture	Description	Product number
	Grundfos level switch MS1 UL with 33 ft cable	98365984
	Grundfos level switch MS1 UL with 40 ft cable	98365985
	Grundfos level switch MS1 UL with 60 ft cable	98365986
	Cable support of stainless steel	98365987
	TM05 6793 5112 Grundfos level switch MS1 Ex IEC ex with 33 ft cable	98372085
	Grundfos level switch MS1 Ex IEC ex with 40 ft cable	98372086
	Grundfos level switch MS1 Ex IEC ex with 60 ft cable	98372087
	Cable support of stainless steel	98365987

Features

SLC

SLC enables:

- control of one pump based on signals from level switches
- control of one pump based on signals from a submersible analog level pressure transducer with float-switch alarms
- battery backup in case of mains supply failure (accessory)
- selection of automatic restarting
- selection of automatic/manual/off setting
- alarm indication of:
 - high water level
 - overload (via motor protection relay).

As standard, SLC has an audio/visual high water level alarm with auto reset.

- audio alarm, 95 dB warble tone at 24"
- visual alarm 7/8" diameter red lens, push to silence
- NEMA 4X, 1 W bulb.

Fig. 25 SLC controller

DLC

DLC enables:

- control of two pumps based on signals from level switches
- control of two pumps based on signals from a submersible analog level pressure transducer with float-switch alarms
- automatic pump changeover (even distribution of operating hours on both pumps)
- battery backup in case of mains supply failure (accessory)
- selection of automatic restarting
- selection of automatic/manual/off setting
- alarm indication of:
 - high water level
 - overload (via motor protection relay).

As standard, DLC has an audio/visual high water level alarm with auto reset:

- audio alarm, 95 dB warble tone at 24"
- visual alarm 7/8" diameter red lens, push to silence
- NEMA 4X, 1 W bulb.

Fig. 26 DLC controller

Level switches

The Grundfos level switches are of the non-mercury type and are available for standard and explosion-proof pumps. The hermetically sealed polypropylene housing and polyurethane cable make the level switch resistant to, for example, many chemicals, alcohol, uric acid, sewage, oils, gasoline and fruit acid.

Location and position of level switches

The level switches are to be installed in the pit floating on the pumped liquid.

The position of the level switches decides when SLC or DLC will start and stop the pump:

- When the level switch is pointing upwards, the level switch contact will be closed and the pump will start.
- When the level switch is pointing downwards, the level switch contact will be opened and the pump will stop.

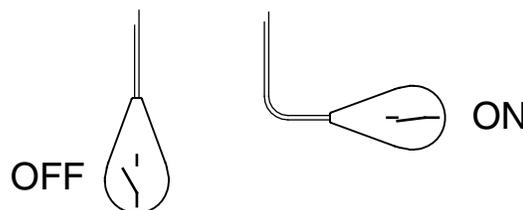

Fig. 27 Level switch positions

Submersible, analog level pressure transducer

The sensor enables constant water level detection. The sensor is installed in the wet well, inside a protective tube. The lower end of the tube must be approx. 20 cm above the bottom of the well. The sensor contains Kevlar rope within the PUR cable jacket to support the weight of the transducer/birdcage combination.

Birdcage

The birdcage sensor guard protects the sensor from floating debris. Its weight provides the sensor with stability, even in light turbulence.

Dedicated Controls

Fig. 28 Dedicated Controls control unit

Grundfos Dedicated Controls is a control system that can control and monitor one to six Grundfos wastewater pumps and a mixer or a flushing valve.

Dedicated Controls are used in installations requiring advanced control and data communication.

The main components of the Dedicated Controls system are:

- CU 362 control unit
- IO 351B module (general I/O module).

Dedicated Controls are available as separate components.

The control system can be operated by:

- float switches
- a level sensor
- a level sensor and safety float switches.

The separate control unit and modules can be built for practically any size of system.

CU 362 control panel

Status menu

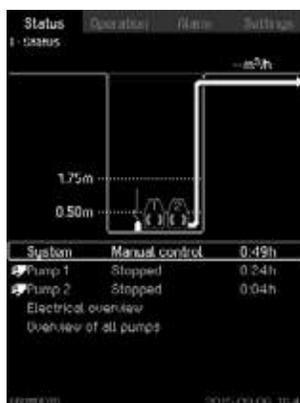

Fig. 30 Status menu

Description

- Graphical illustration of system (upper half of display).
- Clear text parameters.
- Indication of alarms that occur during operation (top and middle of display).
- Reading of system and individual pump performance (lower half of display).
- Button (?) for further information.
- Active buttons are illuminated.

Operation menu

Fig. 31 Operation menu

Description

- Setting of basic parameters, for instance start/stop levels.
- Setting of auto/on/off of system or individual pumps.
- Resetting of alarm relays.
- Button (?) for further information.
- Active buttons are illuminated.

Alarm menu

Fig. 32 Alarm menu

Description

- Current alarm and alarm log with detailed information:
 - What the cause of the fault is.
 - Where the fault occurred (system, pump no. 1 etc.).
 - When the fault occurred (time and date).
 - When the fault disappeared (time and date).
- Alarm snapshot - reading of system and pump parameters at the time of alarm.
- Alarm log with up to 24 historical warnings and alarms.
- Button (?) for further information.
- Active buttons are illuminated.

Settings menu

Fig. 33 Settings menu

Description

- Various settings:
 - Setting of analog/digital inputs and outputs.
 - Setting of application-optimized functions such as energy optimization, foam drainage and advanced alternation.
 - Display language.
 - Communication settings.
 - Ethernet etc.
- Button (?) for further information.
- Active buttons are illuminated.

Dedicated Controls can be fitted with various units:

- The CU 362 control unit, which is the "brain" of the Dedicated Controls system, is fitted in the cabinet front. CU 362 can be fitted with one of the Grundfos CIM communication modules mentioned below, depending on the monitoring needs or the SCADA system:
 - CIM 200 is a Grundfos communication module used for the Modbus RTU fieldbus protocol.
 - CIM 250 is a communication module used for GSM/GPRS communication. CIM 250 establishes communication between CU 362 and a SCADA system, thereby allowing the application to be monitored and controlled remotely. This module also offers SMS messaging, for example status and alarm messages.
 - CIM 270 is a communication module for the Grundfos Remote Management system (GRM). CIM 270 establishes communication between CU 362 and GRM, thereby allowing the application to be monitored and controlled remotely.
- The IO 351B module, which is a general I/O module communicating with CU 362 via GENIbus.
- The MP 204 motor protector (optional), which provides many electrical status values, for example voltage, current, power, insulation resistance and energy. MP 204 offers better protection of the pumps than a conventional motor protection device.

- CUE/VFD (optional), which is either a Grundfos variable-frequency converter or a general variable-frequency converter, also offers better pump protection and a more steady flow through the pit pipes, so the pumps are treated well and the energy consumption is kept at a minimum.

For further information, see the data booklet or installation and operating instructions for Dedicated Controls on www.grundfos.us (Grundfos Product Center).

Name	Dedicated Controls
Application	
One pump	•
Two pumps (up to six pumps)	•
Mixer	•
Battery backup	•
Level sensor	
Float switch	•
Electrodes	
Air bell	
Pressure sensor	•
Ultrasonic sensor	•
Analog level sensor with safety float switches	•
Starting method	
Direct-on-line starting (DOL)	•
Star-delta starting	•
Soft starter	•
Basic functions	
Start and stop of pump(s)	•
Pump alternation	•
High-level alarm	•
Dry-running-level alarm	•
Flow measurement (calculated or via flow sensor)	•
Pump statistics	•
Conflicting-levels alarm	•
Advanced functions	
Start and stop delays (prevent water hammering)	•
Motor temperature sensor	•
Test run/anti-seizing	•
Daily emptying (emptying the pit once a day)	•
Water-in-oil sensor input	•
Communication	
SMS messaging	• ¹⁾
SCADA communication (GSM/GPRS)	• ²⁾
User interface	
Level indication	•
Graphical display	•
PC Tool WW Controls	•

¹⁾ If an SMS module is fitted.

²⁾ If a CIM 250 GSM/GPRS module is fitted in CU 362.

14. Grundfos Product Center

Online search and sizing tool to help you make the right choice.

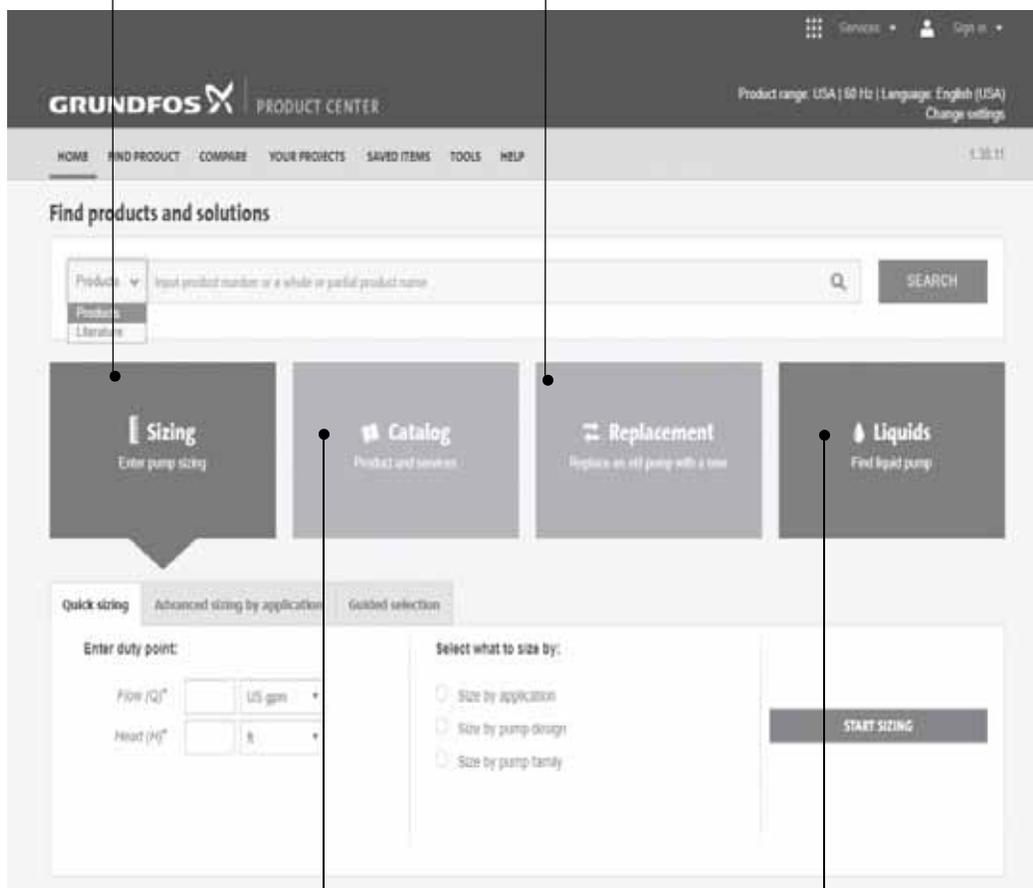

<http://product-selection.grundfos.com>

SIZING enables you to size a pump based on entered data and selection choices.

REPLACEMENT enables you to find a replacement product. Search results will include information on

- the lowest purchase price
- the lowest energy consumption
- the lowest total life cycle cost.

CATALOG gives you access to the Grundfos product catalog.

LIQUIDS enables you to find pumps designed for aggressive, flammable or other special liquids.

All the information you need in one place

Performance curves, technical specifications, pictures, dimensional drawings, motor curves, wiring diagrams, spare parts, service kits, 3D drawings, documents, system parts. The Product Center displays any recent and saved items — including complete projects — right on the main page.

Downloads

On the product pages, you can download Installation and Operating Instructions, Data Booklets, Service Instructions, etc. in PDF format.

Grundfos GO

Mobile solution for professionals on the GO!

Grundfos GO is the mobile tool box for professional users on the go. It is the most comprehensive platform for mobile pump control and pump selection including sizing, replacement and documentation. It offers intuitive, handheld assistance and access to Grundfos online tools, and it saves valuable time for reporting and data collection.

Subject to alterations.
